Summary

Full-Stack Developer specializing in building scalable, production-ready web applications using **Next.js, TypeScript, Node.js, and PostgreSQL**. Experienced in designing RESTful APIs, implementing secure authentication systems, integrating AI APIs, and deploying cloud-based applications. Strong foundation in system design, database architecture, and modern frontend frameworks. Passionate about building AI-powered products and high-performance web platforms.

Experience

Open Source Contribution

- Contributed across 3 open-source projects, including frontend components and backend API enhancements.
- Collaborated using Git workflows (PRs, code reviews), resolving performance and authentication issues while improving codebase maintainability.

Hackathon Experience

- Participated in a team-based hackathon, building a full-stack application under tight deadlines using modern web technologies.
- Implemented core features including API integration, authentication, and responsive UI, contributing to rapid prototype development.

Skill

Languages: C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, RESTful API Development

Databases: PostgreSQL, MongoDB, Supabase

Authentication: NextAuth.js, Clerk, GitHub OAuth

ORM & Tools: Prisma, Git, Docker, Vercel

AI & Automation: Gemini AI API Integration, Inngest

Projects

FinTrack — AI-Powered Personal Finance Application

[GitHub](#) | [Live Demo](#)

Tech: Next.js, React, Supabase, Prisma, Tailwind CSS, Clerk, Gemini AI, Inngest

- Architected a full-stack finance platform with secure authentication and optimized PostgreSQL schema design using Prisma ORM.
- Integrated Gemini AI for automated financial insights, spending predictions, and intelligent budgeting features.
- Built real-time dashboards and background workflows using Inngest for scalable data processing and scheduled analytics.

ReadmeAI — AI-Based README Generator (SaaS)

[GitHub](#) | [Live Demo](#)

Tech: React, Node.js, Express, GitHub OAuth, Gemini AI, Vite

- Built a full-stack SaaS application enabling AI-driven README generation using structured prompt engineering and markdown templating.
- Developed secure RESTful APIs with GitHub OAuth for repository access, parsing, and dynamic content generation.
- Automated documentation workflows, reducing manual effort and improving developer productivity.

INcBlog — Tech Blogging Platform

[GitHub](#) | [Live Demo](#)

Tech: Next.js, TypeScript, Tailwind CSS, Prisma, NextAuth, Sentry

- Engineered a scalable multi-user blogging platform with protected routes and secure authentication using NextAuth.
- Designed relational database architecture with Prisma ORM for efficient data handling and performance optimization.
- Implemented production-grade monitoring (Sentry) and modular architecture to ensure reliability and maintainability.

Education

Maharaja Agrasen Institute of Technology, Delhi

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Aug 2024 – Present

CGPA: 9.2 / 10
